

Polymeric Cable Protection Cover / Tile

“GOLDEN” Brand Polymeric Cable Protection Covers / tiles are a heavy duty protection product manufactured from high impact recycled polyethylene sheet and designed to withstand damage from plant and hand tools. They are ideal for HV power cables from 22KV- 400KV including HVDC cables, as well as fiber optic and gas pipe / water main connections.

Cable covers (or cable tiles) are fully joined, laid overlapped and held firm with plastic jointing pegs. They are a direct replacement for concrete cable covers and steel plate tiles.

ADVANTAGE :

There are many benefits over concrete and steel plate covers / tiles:

- Gives the clearest warning to third parties.
- Can be custom made with sizes to suit.
- Contains company logo in bold warning text for clear identification.
- Damages to cables less likely therefore reducing the cost of repairs and supply disruption.
- Lightweight and easy to install irrespective of weather conditions.
- Durable with good impact resistance.
- Cable Protection Cover/ Tiles can be manufactured in various width, thickness with customized text & length.

Size:

Width in mm	Thickness in mm	Length in mm
150	3 to 12	1000
200	3 to 12	1040
240	3 to 12	1000
244	3 to 12	1000
250	3 to 12	1000
300	3 to 12	1200
400	3 to 12	1200
450	3 to 12	1200

Width in mm	Thickness in mm	Length in mtr
150	2.5 to 3	40
200	2.5 to 3	40
300	2.5 to 3	40
150	5	25
200	5	25
300	5	20
