

Alu. Foil Detectable Warning Tape

“**GOLDEN**” Brand Aluminum Foil Detectable Warning Tape is a detectable aluminum foil tape totally encapsulated between a polythene base layer and a printed polythene protective covering. This detectable underground warning tape is a traceable detectable tape for marking underground pipes, cables and many other underground non-metallic services. The detectable underground warning tape can be located by using cable locator and is therefore essential to lay over non-metallic pipes (Water or Gas) or Fiber Optic Cables.

Specification:

- Specially manufactured to customers requirement.
- Not less than 99.5% purity aluminum foil.
- High Tensile strength.
- Totally encapsulated aluminum foil prevents corrosion.

Advantage:

- Available in customize text.
- Available in various colours.
- Width from 50 mm to 600mm.
- Thickness from 100 to 500 micron.
- Easy traceable by the help of cable locator.
- Aluminum Foil Detectable Warning Tape can be manufactured in various width, thickness with customized text & roll length.

Size:

50	MM	X	100	MICRON	X	500	MTRS
